CONTENTS

No. 1 (DECEMBER, 1933)

Original Articles: PAGE

67. The Nutritive Value of Proteins for Milk Production. II. A Comparison of the Proteins of Blood Meal, Pea Meal, Decorticated Earth-Nut Cake, and a Mixture of Decorticated Earth-Nut Cake and Flaked Maize. S. MORRIS and N. C. WRIGHT 1

68. The Occurrence of Coliform Bacteria in Milk. J. F. MALCOLM 15

69. The Burri Smear-Culture Method for the Determination of the Bacterial Content of Milk Samples. A. CUNNINGHAM and A. ANDREWS 29

70. The Effect of Common Salt on the Growth of Lactic Streptococci in Milk. F. H. MCDOWALL and L. A. WHELAN . 42

71. The Heat Denaturation of Albumin and Globulin in Milk. S. J. ROWLAND 46

72. Phosphorus Compounds of Milk. V. The Phosphorus Partition in Milk, with Preliminary Observations on Milk Phosphatase. W. R. GRAHAM, JR. and H. D. KAY . . 54

73. Phosphorus Compounds of Milk. VI. The Effect of Heat on Milk Phosphatase. A Simple Method for Distinguishing Raw from Pasteurised Milk, Raw from Pasteurised Cream, and Butter made from Raw Cream from that made from Pasteurised Cream. H. D. KAY and W. R. GRAHAM, JR. . 63

Biennial Reviews of the Progress of Dairy Science:

Section C, Dairy Chemistry: W. L. DAVIES 75

4177.

No. 2 (April, 1934)

Original Articles: PAGE

74. Twinning in Cattle. A. C. T. Hewitt 101

75. The Nutritive Value of Proteins for Milk Production. III. The Determination of the Amino Acids of Various Feeds. Samuel Morris 108

76. Variations in the Solids-not-Fat Content of Milk. I and II. S. Bartlett 113

77. A Study of Factors Influencing the Keeping Quality of Some Victorian Salted Butters in Cold Storage. G. Loftus-Hills, L. R. Scharp and T. S. Bellair 124

78. A Study of the Quantitative Changes in the Microbiological Flora of Sweet-Cream Salted Butter of Good Keeping Quality when held at 15° F. for a Period of Two to Eight Months. M. Grimes and A. J. Hennerty 137

79. Studies in Cheddar Cheese. II. The Effect of Controlled Oxidation-reduction Potential on Ripening. III. The Rôle of Rennin, Pepsin and Lactobacilli. W. L. Davies, J. G. Davis, D. V. Dearden and A. T. R. Mattick . . 144

80. An Investigation of Kuban Fermented Milk. V. M. Bogdanoff 153

Biennial Reviews of the Progress of Dairy Science:

Section D. The Diseases of Dairy Cattle: L. Jordan . . 160

I. Bovine Tuberculosis 160

II. Contagious Abortion 166

III. Mastitis 172

No. 3 (September, 1934)

Original Articles: PAGE

81. Variations in the Solids-not-fat Content of Milk. III. S. Bartlett 179

82. Studies in the Ripening of Cheddar Cheese. IV. The Bacterial Flora of Cheese made from Milk of a Very Low Bacterial Count. V. The Influence of the Rennet Flora on the Flora of the Cheese. VI. The Influence of the Starter on the Ripening Process. L. A. Allen and N. R. Knowles 185

83. Observations on Sudden Changes in the Rate of Acid Formation in Milk by Cultures of Lactic Streptococci. H. R. Whitehead and G. A. Cox 197

84. The Influence of Lactic Streptococci on the Ripening of Cheddar Cheese. I. R. Sherwood and H. R. Whitehead 208

85. Non-pathogenic Haemolytic Streptococci Occurring in Milk. F. C. Minett and A. W. Stableforth . . . 223

86. A Coliform Organism Isolated from Milk. E. R. Hiscox . 233

87. Factors Affecting the Solubility of Milk Powders. III. Some Physico-chemical Properties of Concentrated Solutions of Milk Solids. G. R. Howat and N. C. Wright . 236

88. A Technique for the Determination of Lactose in Milk by the Hagedorn-Jensen Method. J. H. Blackwood . . 245

Biennial Reviews of the Progress of Dairy Science:

Section E. The Nutritional Value of Milk and Milk Products: S. K. Kon 250
